PROFESSIONAL SUMMARY

Final-year B.Sc. Computer Science student with internship experience in Data Science, Data Analytics, AI/ML, and AI market research. Proficient in Python, SQL, Power BI, Tableau, and Excel, with strong grounding in machine learning, dashboard development, and business analytics. Experienced in data cleaning, EDA, KPI reporting, predictive modeling, and visualization. Seeking Data Science or Data Analytics roles to deliver data-driven business solutions.

TECHNICAL SKILLS

Programming & Databases: Python, SQL
Data Analytics: Excel, Power BI, Tableau
Data Science: EDA, Data Cleaning, Feature Engineering, Machine Learning
Visualization & Reporting: KPI Dashboards, Data Modeling, Business Intelligence
Libraries & Tools: Scikit-Learn, Pandas, NumPy, FastAPI, Computer Vision, Notion

EXPERIENCE

Research Analyst Intern (AI Market Research)
Stringsway Tech | Aug 2026 – Oct 2026
- Explored different domains and real-world problems to identify gaps where AI could add value.
- Researched AI tools, trends, and competitors to find market opportunities and AI-driven solutions.
- Compiled findings into structured reports and visual summaries for stakeholders.

Data Analytics Intern
Syntech Technologies | Dec 2025 – Mar 2026
- Designed dashboard solutions to continuously monitor business performance metrics.
- Created visual reports and KPI tracking systems for operational decision-making.

AI & ML Intern
Syntech Technologies | Dec 2025 – Mar 2026
- Built and evaluated supervised machine learning models using Scikit-Learn.
- Improved accuracy through feature engineering, hyperparameter tuning, and validation.

Data Science & Analytics Intern
Cinute Digital Pvt. Ltd. (CDPL) | Aug 2025 – Oct 2025
- Performed data cleaning, EDA, and feature engineering on real business datasets.
- Built interactive Power BI, Tableau, and Excel dashboards to track KPIs and business trends.
- Delivered actionable insights to stakeholders to support strategic decision-making.

PROJECTS

MarineGuardian – Academic Research Project
- Built an AI-powered maritime safety prototype integrating live vessel tracking, weather monitoring, marine hazard detection, and alternate route generation using Python, FastAPI, and computer vision.
- Documented the research, methodology, and findings in a research paper as part of academic coursework.

KneeNova – AI Knee MRI Abnormality Detection & Analysis Platform
- Developed an AI-powered platform to analyze knee MRI scans and detect potential abnormalities.
- Generated structured insights to support efficient medical image interpretation and clinical decision-making.

Superstore Performance Analysis | Power BI, DAX
- Built a retail analytics dashboard tracking sales, profit margins, and regional performance.
- Analyzed discount impact on profitability and growth trends using DAX measures and calculated columns.

Hospital Operations & Patient Analytics | Power BI
- Developed a multi-page healthcare dashboard monitoring admissions, outcomes, and resource utilization.
- Enabled cross-departmental performance tracking through interactive KPI visuals and drill-through filters.

HR Attrition Analysis | Tableau
- Identified attrition patterns across tenure, age groups, departments, and job roles.
- Created dashboards to support HR workforce retention planning and risk identification.

Sales & Operations Analysis | Excel
- Built financial reporting dashboards covering P&L analysis, revenue trends, and cost structures.
- Implemented slicers, waterfall charts, and variance analysis for executive decision support.

EDUCATION

B.Sc. Computer Science
Bhavan's College, Andheri West — Mumbai University | Jun 2024 – Mar 2027 | CGPA: 8.68 (Sem IV)
